Mobile wireless networks pose interesting challenges for routing system design. To produce feasible routes in a mobile wireless network, a routing system must be able to accommodate roving users, changing network topology, and fluctuating link quality. We discuss the impact of node mobility and wireless communication on routing system design, and we survey the set of techniques employed in or proposed for routing in mobile wireless networks.

**54 Tracking: Inertial and magnetic posture tracking for inserting humans into networked virtual environments** 

Eric R. Bachmann, Robert B. McGhee, Xiaoping Yun, Michael J. Zyda

November 2001 **Proceedings of the ACM symposium on Virtual reality software and technology**

Full text available:  pdf(742.06 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Rigid body orientation can be determined without the aid of a generated source using nine-axis MARG (Magnetic field, Angular Rate, and Gravity) sensor unit containing three orthogonally mounted angular rate sensors, three orthogonal linear accelerometers and three orthogonal magnetometers. This paper describes a quaternion-based complementary filter algorithm for processing the output data from such a sensor. The filter forms the basis for a system designed to determine the posture of an articul ...

**Keywords:** body tracking, complementary filtering, inertial/magnetic sensors, quaternions, virtual environments

**55 Conditions on input vectors for consensus solvability in asynchronous distributed systems** 

Achour Mostefaoui, Sergio Rajsbaum, Michel Raynal

July 2001 **Proceedings of the thirty-third annual ACM symposium on Theory of computing**

Full text available:  pdf(288.66 KB) Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

This paper introduces and explores a new condition based approach to solve the consensus problem in asynchronous systems. The approach consists of identifying sets of input vectors, called conditions, for which it is possible to design a protocol solving consensus despite the occurrence of up to  $f$  process crashes. The first main result is a generic consensus protocol for the shared memory model. It always guarantees agreement, and ...

**Keywords:** asynchronous systems, consensus, fault-tolerance

**56 Performance Evaluation: Characterizing the interaction between routing and MAC protocols in ad-hoc networks** 

Chris Barrett, Achla Marathe, Madhav V. Marathe, Martin Drozda

June 2002 **Proceedings of the 3rd ACM international symposium on Mobile ad hoc networking & computing**

Full text available:  pdf(203.44 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

We empirically study the effect of mobility and interaction between various input parameters on the performance of protocols designed for wireless ad-hoc networks. An important objective is to study the interaction of the routing and MAC layer protocols under different mobility parameters. We use three basic mobility models: grid mobility model, random waypoint model, and exponential correlated random model. The performance of protocols is measured in terms of various quality of service measures ...

**Keywords:** ad hoc networks, performance analysis, statistical analysis

57 [Interactive display of large-scale NURBS models](#)

Subodh Kumar, Dinesh Manocha, Anselmo Lastra

April 1995 **Proceedings of the 1995 symposium on Interactive 3D graphics**

Full text available:  [pdf\(3.19 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

We present serial and parallel algorithms for interactive rendering of large scale and complex NURBS models on current graphics systems. The algorithms tessellate the NURBS surfaces into triangles and render them using triangle rendering engines. The main characteristics of the algorithms are improved polygonization algorithms, exploitation of spatial and temporal coherence and back-patch culling. Polygonization anomalies like cracks and angularities are avoided. We analyze a number of issu ...

58 [Scalability: Directional virtual carrier sensing for directional antennas in mobile ad hoc networks](#)

Mineo Takai, Jay Martin, Rajive Bagrodia, Aifeng Ren

June 2002 **Proceedings of the 3rd ACM international symposium on Mobile ad hoc networking & computing**

Full text available:  [pdf\(1.24 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper presents a new carrier sensing mechanism called DVCS (Directional Virtual Carrier Sensing) for wireless communication using directional antennas. DVCS does not require specific antenna configurations or external devices. Instead it only needs information on AOA (Angle of Arrival) and antenna gain for each signal from the underlying physical device, both of which are commonly used for the adaptation of antenna pattern. DVCS also supports interoperability of directional and omni-directi ...

**Keywords:** IEEE 802.11, carrier sensing, directional antenna systems, medium access control, mobile ad hoc networks

59 [Scheduling real-time traffic with deadlines over a wireless channel](#)

Sanjay Shakkottai, R. Srikant

January 2002 **Wireless Networks**, Volume 8 Issue 1

Full text available:  [pdf\(244.76 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Recently, there has been widespread interest in the extension of data networks to the wireless domain. However, scheduling results from the wireline domain do not carry over to wireless systems because wireless channels have unique characteristics not found in wireline channels, namely, limited bandwidth, bursty channel errors and location-dependent channel errors. In this paper, we study the problem of scheduling multiple real-time streams with deadlines, over a shared channel. We show that, in ...

**Keywords:** Quality-of-Service, bursty channels, real-time traffic, scheduling

60 [RDMAR: a bandwidth-efficient routing protocol for mobile ad hoc networks](#)

George Aggelou, Rahim Tafazolli

August 1999 **Proceedings of the 2nd ACM international workshop on Wireless mobile multimedia**

Full text available:  [pdf\(916.53 KB\)](#)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

**Keywords:** dynamic routing, mobile terminal, multihop networks

**1 Database session 3: data management in mobile environments: Exploring group mobility for replica data allocation in a mobile environment**

Jiun-Long Huang, Ming-Syan Chen, Wen-Chih Peng  
November 2003 **Proceedings of the twelfth international conference on Information and knowledge management**

Full text available: [pdf\(195.75 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The growth in wireless communication technologies attracts a considerable amount of attention in mobile ad-hoc networks. Since mobile hosts in an ad-hoc network usually move freely, the topology of the network changes dynamically and disconnection occurs frequently. These characteristics make a mobile ad-hoc network be likely to be separated into several disconnected partitions, and the data accessibility is hence reduced. Several schemes are proposed to alleviate the reduction of data accessibi ...

**2 Pen computing: a technology overview and a vision**

André Meyer  
July 1995 **ACM SIGCHI Bulletin**, Volume 27 Issue 3

Full text available: [pdf\(5.14 MB\)](#) Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

This work gives an overview of a new technology that is attracting growing interest in public as well as in the computer industry itself. The visible difference from other technologies is in the use of a pen or pencil as the primary means of interaction between a user and a machine, picking up the familiar pen and paper interface metaphor. From this follows a set of consequences that will be analyzed and put into context with other emerging technologies and visions. Starting with a short historic ...

**3 Mobile connectivity protocols and throughput measurements in the Ricochet Microcellular data network (MCDN) system**

Mike Ritter, Robert J. Friday, Rodrigo Garces, Weill San Filippo, Cuong-Thinh Nguyen  
July 2001 **Proceedings of the 7th annual international conference on Mobile computing and networking**

Full text available: [pdf\(178.43 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

We describe the protocols implemented in the Ricochet MCDN system to provide continuous connectivity to mobile users traveling up to 70 mph. These protocols are general in nature for any frequency-hopping microcell-based system, particularly those that follow the FCC part 15.247 rules [9] and operate in unlicensed spectrum. We also present throughput measurements as a function of velocity and describe a model to predict those numbers based upon the protocols implemented. The MCDN system is a ...

**Keywords:** MCDN system architecture, Mobility, wireless networks, wireless protocols, wireless routing

**4 Geography-informed energy conservation for Ad Hoc routing**

Ya Xu, John Heidemann, Deborah Estrin

July 2001 **Proceedings of the 7th annual international conference on Mobile computing and networking**

Full text available:  pdf(399.65 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

We introduce a *geographical adaptive fidelity* (GAF) algorithm that reduces energy consumption in ad hoc wireless networks. GAF conserves energy by identifying nodes that are equivalent from a routing perspective and then turning off unnecessary nodes, keeping a constant level of routing *fidelity*. GAF moderates this policy using application- and system-level information; nodes that source or sink data remain on and intermediate nodes monitor and balance energy use. GAF is indepen ...

**5 Indexing the positions of continuously moving objects**

Simonas Šaltenis, Christian S. Jensen, Scott T. Leutenegger, Mario A. Lopez

May 2000 **ACM SIGMOD Record , Proceedings of the 2000 ACM SIGMOD international conference on Management of data**, Volume 29 Issue 2

Full text available:  pdf(182.13 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The coming years will witness dramatic advances in wireless communications as well as positioning technologies. As a result, tracking the changing positions of objects capable of continuous movement is becoming increasingly feasible and necessary. The present paper proposes a novel, R\*-tree based indexing technique that supports the efficient querying of the current and projected future positions of such moving objects. The technique is capable of indexing objects moving in one-, two-, and th ...

**6 A spectral algorithm for envelope reduction of sparse matrices**

S. T. Barnard, A. Pothen, H. D. Simon

December 1993 **Proceedings of the 1993 ACM/IEEE conference on Supercomputing**

**9 Streams, structures, spaces, scenarios, societies (5s): A formal model for digital libraries**

Marcos André Gonçalves, Edward A. Fox, Layne T. Watson, Neill A. Kipp

April 2004 **ACM Transactions on Information Systems (TOIS)**, Volume 22 Issue 2

Full text available: [pdf\(316.85 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Digital libraries (DLs) are complex information systems and therefore demand formal foundations lest development efforts diverge and interoperability suffers. In this article, we propose the fundamental abstractions of Streams, Structures, Spaces, Scenarios, and Societies (5S), which allow us to define digital libraries rigorously and usefully. Streams are sequences of arbitrary items used to describe both static and dynamic (e.g., video) content. Structures can be viewed as labeled directed gra ...

**10 Creating reference architectures: an example from avionics**

Don Batory, Lou Coglianese, Mark Goodwin, Steve Shafer

August 1995 **ACM SIGSOFT Software Engineering Notes , Proceedings of the 1995 Symposium on Software reusability**, Volume 20 Issue SI

Full text available: [pdf\(1.08 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

ADAGE is a project to define and build a domain-specific software architecture (DSSA) environment for assisting the development of avionics software. A central concept of DSSA is the use of software system generators to implement component-based models of software synthesis in the target domain [SEI90]. In this paper, we present the ADAGE component-based model (or reference architecture) for avionics software synthesis. We explain the modeling procedures used, review our initial g ...

**11 Robust position-based routing in wireless Ad Hoc networks with unstable transmission ranges**

Lali Barrière, Pierre Fraigniaud, Lata Narayanan

July 2001 **Proceedings of the 5th international workshop on Discrete algorithms and methods for mobile computing and communications**

Full text available: [pdf\(736.30 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Several papers showed how to perform routing in *ad hoc* wireless networks based on the positions of the mobile hosts. However, all these protocols are likely to fail if the transmission ranges of the mobile hosts vary due to natural or man-made obstacles or weather conditions. These protocols may fail because in routing either some connections are not considered which effectively results in disconnecting the network, or the use of some connections causes livelocks. In this paper, we des ...

**13 Cyberguide: a mobile context-aware tour guide**

Gregory D. Abowd, Christopher G. Atkeson, Jason Hong, Sue Long, Rob Kooper, Mike Pinkerton

October 1997 **Wireless Networks**, Volume 3 Issue 5

Full text available: [pdf\(596.81 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Future computing environments will free the user from the constraints of the desktop. Applications for a mobile environment should take advantage of contextual information, such as position, to offer greater services to the user. In this paper, we present the Cyberguide project, in which we are building prototypes of a mobile context-aware tour guide. Knowledge of the user's current location, as well as a history of past locations, are used to provide more of the kind of services that we co ...

**14 Formalizing space shuttle software requirements: four case studies**

Judith Crow, Ben Di Vito

July 1998 **ACM Transactions on Software Engineering and Methodology (TOSEM)**, Volume 7 Issue 3

Full text available: [pdf\(267.77 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

This article describes four case studies in which requirements for new flight software subsystems on NASA's Space Shuttle were analyzed using mechanically supported formal methods. Three of the studies used standard formal specification and verification techniques, and the fourth used state exploration. These applications illustrate two thesis: (1) formal methods complement conventional requirements analysis processes effectively and (2) formal methods confer benefits even when only selecti ...

**15 The evolution of perspective view in WalkMap**

Riku Suomela, Kimmo Roimela, Juha Lehikoinen

October 2003 **Personal and Ubiquitous Computing**, Volume 7 Issue 5

Full text available: [pdf\(485.11 KB\)](#) Additional Information: [full citation](#), [abstract](#)

A wearable computer is a potential platform for map applications: it is mobile in nature, and is often equipped with a head-worn display capable of displaying maps of the surrounding area in graphical form. In this paper, we present a map application, called WalkMap, developed for wearable computers. We concentrate on the visual presentation of the map, and propose a visualisation method that is based on the perspective distortion of a regular two-dimensional bird's-eye view map. We also describ ...

**Keywords:** Map, Navigation, Perspective, Three-dimensional, User study, Wearable computing

**16 A game-theoretic approach towards congestion control in communication networks**

Rahul Garg, Abhinav Kamra, Varun Khurana

July 2002 **ACM SIGCOMM Computer Communication Review**, Volume 32 Issue 3

Full text available: [pdf\(379.11 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Most of the end-to-end congestion control schemes are "voluntary" in nature and critically depend on end-user cooperation. We show that in the presence of selfish users, all such schemes will inevitably lead to a congestion collapse. Router and switch mechanisms such as service disciplines and buffer management policies determine the sharing of resources during congestion. We show, using a game-theoretic approach, that all currently proposed mechanisms, either encourage the behaviour that leads ...

**17 Location Discovery and Network Management: The bits and flops of the n-hop multilateration primitive for node localization problems**

Andreas Savvides, Heemin Park, Mani B. Srivastava

September 2002 **Proceedings of the 1st ACM international workshop on Wireless sensor networks and applications**

Full text available: [pdf\(300.94 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The recent advances in MEMS, embedded systems and wireless communication technologies are making the realization and deployment of networked wireless microsensors a tangible task. Vital to the success of wireless microsensor networks is the ability of microsensors to ``collectively perform sensing and computation''. In this paper, we study one of the fundamental challenges in sensor networks, node localization. The collaborative multilateration presented here, enables ad-hoc deployed sensor node ...

**Keywords:** ad-hoc localization, distributed localization, sensor net-works

**18 Location information: Geographic routing without location information**

Ananth Rao, Christos Papadimitriou, Scott Shenker, Ion Stoica

September 2003 **Proceedings of the 9th annual international conference on Mobile computing and networking**

Full text available: [pdf\(993.16 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

For many years, scalable routing for wireless communication systems was a compelling but elusive goal. Recently, several routing algorithms that exploit geographic information (e.g. GPSR) have been proposed to achieve this goal. These algorithms refer to nodes by their location, not address, and use those coordinates to route greedily, when possible, towards the destination. However, there are many situations where location information is not available at the nodes, and so geographic methods can ...

**Keywords:** ad-hoc, coordinate-based, geographoc, routing, sensornets

**19 A new connection admission control for spotbeam handover in LEO satellite networks**

Sungrae Cho, Ian F. Akyildiz, Michael D. Bender, Huseyin Uzunalioğlu

July 2002 **Wireless Networks**, Volume 8 Issue 4

Full text available: [pdf\(313.30 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Frequent spotbeam handovers in *low earth orbit* (LEO) satellite networks require a technique to decrease the handover blocking probabilities. A large variety of schemes have been proposed to achieve this goal in terrestrial mobile cellular networks. Most of them focus on the notion of prioritized channel allocation algorithms. However, these schemes cannot provide the connection-level *quality of service* (QoS) guarantees. Due to the scarcity of resources in LEO satellite networks, a ...

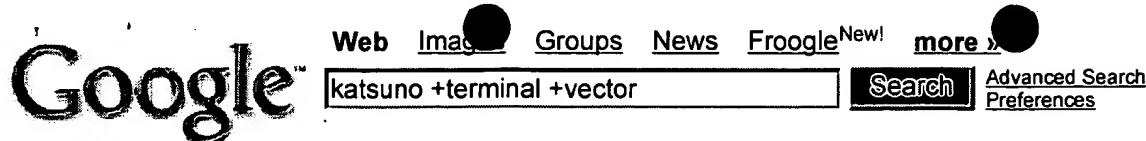

**Keywords:** LEO satellite networks, channel allocation, connection admission control, handover management

**20 Rapid prototyping of mobile context-aware applications: the Cyberguide case study**

Sue Long, Rob Kooper, Gregory D. Abowd, Christopher G. Atkeson

November 1996 **Proceedings of the 2nd annual international conference on Mobile computing and networking**

The image shows a Google search results page. At the top, there's a navigation bar with links for Web, Images, Groups, News, Froogle New!, and more. Below the bar is a search bar containing the query "katsuno +gps". To the right of the search bar are "Search" and "Advanced Search" buttons, along with a "Preferences" link. The main content area displays search results. On the left, under the heading "Web", there are several links to PDF documents and other web pages related to KATSUNO and GPS. On the right side of the page, there are several "Sponsored Links" for various GPS-related products and services, such as "The GPS Store", "Gps", "Free Shipping at GPSCity.", "GPS Antennas", "All types of GPS Systems", and "Global Positioning System".

导航系统(97-2000)

共有 103 条信息

上一页 下一页 第 45 页

类别:  标题: 作者: **Intercommunicating car navigation system with dynamic route finding**

作者	Hiraiishi, H.; Ohwada, H.; Mizoguchi, F.	
来源	Intelligent Transportation Systems, 1999. Proceedings. 1999 IEEE/IEEJ/JSAI International Conference on Published( 1999)	
卷期	页码	284 -289

**Investigation of Kalman filter divergence using robust stability techniques [combat aircraft tracking/navigation system]**

作者	Pearson, J.; Goodall, R.; Eastham, M.; MacLeod, C.		
来源	Decision and Control, 1997., Proceedings of the 36th IEEE Conference on Published( 1997)		
卷期	5	页码	4892 -4893 vol. 5

**Lessons learned from C-141C GPS enhanced navigation system (GPSENS) developmental flight test**

作者	Seo, J.S.; McCann, C.C.		
来源	Aerospace Conference, 1999. Proceedings. 1999 IEEE( 1999)		
卷期	3	页码	53 -61 vol. 3

**Magical device: a small device that makes it easy to build real-world navigation systems**

作者	Katsuno, Y.; Honda, R.		
来源	Systems, Man, and Cybernetics, 2000 IEEE International Conference on Published( 2000)		
卷期	2	页码	914 -919 vol. 2

**MONAI: an autonomous navigation system for mobile robots**

作者	Carre, F.; Gallo, L.; Mazar, B.; Megel, F.; Serra, B.		
来源	Robotics and Automation, 1998. Proceedings. 1998 IEEE International Conference on Published( 1998)		
卷期	3	页码	2434 -2445 vol. 3

**Navigation system design using time-varying complementary filters**

作者	Pascoal, A.; Kammerer, I.; Oliveira, P.		
来源	Control Applications, 1998. Proceedings of the 1998 IEEE International Conference on Published( 1998)		
卷期	2	页码	1099 -1104 vol. 2

**Navigation system design using time-varying complementary filters**

作者	Pascoal, A.; Kammerer, I.; Oliveira, P.		
来源	Aerospace and Electronic Systems, IEEE Transactions on Published( Oct. 2000)		
卷期	36 4	页码	1099 -1114

**Navigation systems design: an application of multi-rate filtering theory**

作者	Oliveira, P.; Pascoal, A.		
来源	OCEANS '98 Conference Proceedings( 1998)		
卷期	3	页码	1348 -1353 vol. 3

**Navigation systems for increasing the autonomy and security of mobile bases for disabled people**

作者	Fiorotti, S.; Loo, T.; Longhi, S.		
来源	Robotics and Automation, 1998. Proceedings. 1998 IEEE International Conference on Published( 1998)		
卷期	1	页码	393 -398 vol. 1

**Navigation systems integration**

作者	Gordon, G.S.		
来源	Airborne Navigation Systems Workshop (Ref. No. 1998/275), IEE( 1998)		
卷期		页码	4/1 -416

**Navigation systems requirements for airborne interferometric SAR platforms**

作者	Bara, M.; Monne, J.; Broquetas, A.		
来源	Geoscience and Remote Sensing Symposium, 1999. IGARSS '99 Proceedings. IEEE 1999 International( 1999)		
卷期	4	页码	2158 -2160 vol. 4

**Next generation marine precision navigation system**

作者	Rice, H.; Mendelsohn, L.; Aarons, R.; Mazzola, D.		
来源	Position Location and Navigation Symposium, IEEE 2000( 2000)		
卷期		页码	200 -206

On-line shape recovery in lateral navigation system using motion stereo technique			
作者	Park, M. S.; Mozerov, M.; Kim, D. Y.; Roh, K. S.; Cho, T. S.		
来源	Multisensor Fusion and Integration for Intelligent Systems, 1999. MFI '99. Proceedings. 1999 IEEE/SICE/RSJ International Conference on Published( 1999)		
卷期		页码	273 -278

Personal Intelligent Navigation System based on Java			
作者	Sun Yuan; Jiang He; Wang Kehong		
来源	Technology of Object-Oriented Languages and Systems, 1999. TOOLS 31. Proceedings( 1999)		
卷期		页码	477 -483

Portable traveling navigation system for the blind and its application to traveling training system			
作者	Tadokoro, Y.; Takuno, S.; Shimoda, Y.		
来源	BMES/EMBS Conference, 1999. Proceedings of the First Joint( 1999)		
卷期	1	页码	589 vol.1

POS/SV-an aided inertial navigation system for submersible vehicles			
作者	Woolven, S.; Field, M.		
来源	OCEANS '98 Conference Proceedings( 1998)		
卷期	1	页码	103 -107 vol.1

Position control of wheeled mobile robot using the inertial navigation system			
作者	Chongkug Park; Pungryeoul Park; Harashima, F.		
来源	Advanced Intelligent Mechatronics '97. Final Program and Abstracts., IEEE/ASME International Conference on Published( 1997)		
卷期		页码	120

Power spectral analysis of walking stability using personal navigation system			
作者	Tsuruoka, M.; Yasuoka, Y.; Shibasaki, R.; Tianan Chen; Akutsu, O.; Tanaka, M.; Tsuruoka, Y.; Murai, S.		
来源	Systems, Man, and Cybernetics, 1999. IEEE SMC '99 Conference Proceedings. 1999 IEEE International Conference on Published( 1999)		
卷期	1	页码	101 -106 vol.1

Precision hybrid navigation system for varied marine applications			
作者	Beiter, S.; Poquette, R.; Filipo, B. S.; Goetz, W.		
来源	Position Location and Navigation Symposium, IEEE 1998( 1998)		
卷期		页码	316 -323

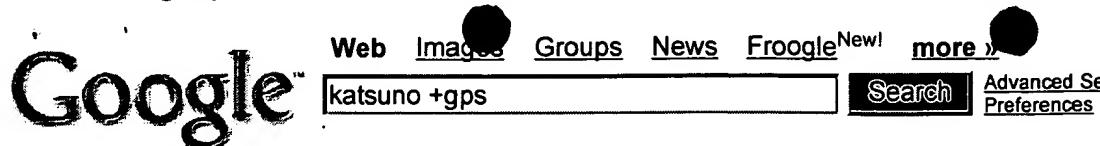

Real-time 3-D model-based navigation system for endoscopic paranasal sinus surgery			
作者	Yamashita, J.; Yamuchi, Y.; Mochimaru, M.; Fukui, Y.; Yokoyama, K.		
来源	Biomedical Engineering, IEEE Transactions on Published( Jan. 1999)		
卷期	46 1	页码	107 -116
